EDUCATION

University of California, Davis Bachelor of Science in Computational Cognitive Science (Computer Science + Psychology) Mar. 2026

EXPERIENCE

Project Manager

April. 2026 - present

Compass Real Estate | Palo Alto, CA

- Manage marketing, transaction, and renovation workflows for luxury residential properties valued up to \$8.5M, coordinating across lenders, contractors, designers, inspectors, and HOAs.
- Leverage LLMs and AI-assisted workflows to create floorplans, renderings, marketing campaigns, and property visualizations, accelerating content production and client-facing communications.
- Lead social media and branding initiatives by creating listing campaigns, client testimonials, market updates, and content strategies to strengthen agent visibility and brand identity.
- Analyze local housing market trends and performance metrics to create data-driven reports and messaging that support client communications, marketing efforts, and business development initiatives.

Commercial Marketing Intern

Jul. 2025 - Sept. 2025

PagerDuty | San Francisco, CA

- Analyzed churn trends across 1,200+ customer accounts representing \$2.9M+ ARR, identifying 48 high-value risk segments to inform retention and lifecycle marketing strategy.
- Built and maintained daily churn dashboards on Excel, enabling cross-functional teams to proactively respond to revenue risk and prioritize outreach.
- Identified stalled expansion opportunities between customers and Account Executives, improving pipeline visibility and supporting faster re-engagement on at-risk deals.
- Developed 500+ targeted prospect lists focused on AI and emerging tech accounts, contributing to 200+ high-intent outbound opportunities and improved campaign targeting.
- Applied cognitive psychology principles to refine messaging, landing page structure, and customer journey touchpoints, improving clarity of value proposition and engagement.
- Analyzed daily ARR and churn performance against prior-quarter and year-over-year benchmarks, informing retention efforts that contributed to a 29% reduction in quarterly churn over the course of the internship.

UI/UX Designer

Sept. 2023 - Jun. 2024

Davis Design Interactive | Davis, CA

- Conducted user research and usability testing to identify friction points and improve digital product experiences.

Delegate

Sept. 2022 - Jan. 2023

California Democratic Party | Davis, CA

- Developed social media campaigns across TikTok and Instagram generating 15K+ engagements.

PROJECTS

Navify [deck](#) - Campus Navigation System Built Using AI Algorithms

- Built indoor/outdoor navigation system using A* pathfinding, computer vision, and contextual routing models.
- Applied Markov chain modeling and weighted optimization (traffic, safety, weather) to improve navigation behavior.
- Evaluated search/optimization algorithms, selecting the most effective solution based on navigation accuracy and performance.

Portfolio Website [link](#) - AI-Assisted Frontend Development using LLM Workflows, HTML, CSS, GitHub Pages, and VSCode

- Built and deployed responsive portfolio website using AI-assisted frontend development workflows.
- Leveraged Codex within VSCode to accelerate UI implementation, debugging, and iterative design refinement.
- Managed version control and deployment through GitHub Pages.

SKILLS

Data & Tools: Tableau, Salesforce, Excel, Python, Data Analysis, ZoomInfo, GitHub, VSCode, Claude, Google Stitch, Codex, ChatGPT
